

5 Styles for use in either SD (4:3) or HD (16:9) Aspect Formats

An effect that has a wave of an image zoom move from one image boundary to another. As the wave effect subsides on any part the initial image, the next image fades into view. Note that *Setup* below refers to slide image placement prior to applying the style.

**Circular Strips**

Any Aspect Show

2 Landscape Images

1 Style

As strips of the initial image start zooming out they start fading away too and reveal a strip of the next image zooming in. The effect moves from screen center to the outside edges.

Setup: Layer 1 = Initial Landscape; Layer 2 = Next Landscape.

See notes below.

**Oval Strips CTR**

Any Aspect Show

2 Landscape Images

1 Style

As strips of the initial image start zooming out they start fading away too and reveal a strip of the next image zooming in. The effect moves from screen center to the outside edges.

Setup: Layer 1 = Initial Landscape; Layer 2 = Next Landscape.

See notes below.

**Oval Strips DN**

Any Aspect Show

2 Landscape Images

1 Style

As strips of the initial image start zooming out they start fading away too and reveal a strip of the next image zooming in. The effect moves from top to bottom.
